Project Title: Student Skill Development Management System
Project Description: Module 3 – : Skill Progress & Career Management
This module monitors the student's overall skill development and connects their abilities with future career opportunities. It tracks achievements, recommends suitable career paths, and helps students identify internships and job opportunities that match their skills.
● Monitoring the student's skill improvement over time. ● Comparing current skills with previous assessment results. ● Recording student projects and practical experiences. ● Maintaining details of achievements and certifications. ● Providing personalized career recommendations. ● Suggesting suitable internships based on student skills. ● Displaying relevant job and career opportunities. ● Helping students identify skills required for selected careers. ● Generating skill development and career-readiness reports. ● Providing an overall summary of the student's career progress.
